

# ONGC PUBLIC SCHOOL NERAVY - KARAIKAL

A fire safety mock demo was conducted by ONGC, Karaikal to create awareness among students about fire safety and the importance of taking preventive measures in case of a fire emergency. The demo was conducted in the school playground and was attended by all students of classes VI to VIII, along with their teachers.

The demonstration began with a brief introduction to fire safety and the role of the fire safety department in ensuring the safety of people and property. The department personnel then proceeded to demonstrate various fire safety equipment's, such as fire extinguishers, fire alarms, and sprinkler systems.

The demo also included a simulated fire emergency scenario, where the department personnel demonstrated how to evacuate a building in the event of a fire. They explained the importance of staying calm, following evacuation procedures, and taking necessary precautions to ensure the safety of oneself and others.

The students were also given an opportunity to participate in the mock demo. They were divided into groups and were given hands-on experience in using fire extinguishers to put out small fires. This helped them understand the proper technique of using fire extinguishers and also gave them a sense of empowerment in dealing with fire emergencies.

The demo was followed by a Q&A session where students asked questions about fire safety, prevention measures, and the role of the fire safety department. The department personnel answered all questions patiently and provided additional information on fire safety.
